

## Description

The new series panel heaters are a modern and very reliable solution for electric heating. Ideal for Commercial build-ings, Hotels, Student Accommodation, Holiday Homes, Domestic Dwellings and Garden Offices. Radiators heat the room using the gentle convection of air. Heaters are made of pressed steel with an anti-corrosion powder coating resistant to moisture and high temperatures. The shape of the airoutlet fins allows for gentle and uniform heat distribution around the room.

The heaters have a power on/off switch that is easily accessible should they need to be manually turned off. The stainless steel heating element is low temperature so they are silent and do not smell like other electric heaters. The T17 series of heaters are suitable for bathroom installation\*. Manufactures Warranty on this range is 5 Years. The T17 series are wall mounted and also have the option for casters and free standing solution on request.

## Application

- ElectricHeating

## Features

- Safety thermostat
- Silent operation
- Safety class IP 24/20
- Fast and comfort heating
- Slim design
- "Mini" BEMS (central control option)\*

## Technical Data

- Rated voltage: 220 V-50Hz
- Rated power: 500-2500 W
- Indoor Use Only
