

Description

The Talia classic towel rail is an attractive yet robust unit, very popular in general domestic homes, hotels and rented accommodation for bathroom and shower room installations.

The finish is Chrome as standard, but also available in; White or Black. They can come in a variety of heat outputs, widths and heights to fit almost any size of room from the very large to the very compact.

The towel radiators are heated with a high efficiency PTC element for uniform heating without power variations. They can be heated with the electric element, with water as part of a plumbed system or by both. All sizes and variations can be controlled directly by the Genius Hub.
