

Description

The Wireless Room Thermostat is a sleek and stylish thermostat which provides both accurate temperature feedback for the room it is placed in, and manual control of the temperature for that room. Using the simple buttons on the front of it to change the target temperature for the room, which is then neatly displayed in the top right corner of the thermostat.

With the large display it enables you to immediately see the accurate measured temperature in the room. As these are not next to radiators, behind sofas or heavy curtains, like radiator valves are, they give a highly accurate reading of what the whole room feels like.

This is a “wire-free” solution, saving both time and money. All communication between this Wireless Room Thermostat and the Genius Hub is 100% wireless.

The Wireless Room Thermostat can be used as a temperature sensor for an electric or underfloor heating zone, instead of a Wireless Room Sensor.

Application

- Wet Radiator Control
- Electric Heating Control
- Wet Underfloor Heating

Features

- Temperature Detection
- Manual Override (Boost)
- Current Temperature Display
- High Accuracy Temperature Control
- Supplied with 3 AA batteries, lasts for 2 years

Technical Data

- Power Supply: 3 1.5V AA alkaline batteries
- Transmission Frequency: 868.42 (EU) MHz
- Temperature Range: 5°C to 30°C
- Backlight: White LED
- Operating Temperature: 0°C to 40°C
- Relative Humidity: 5% to 85%
- Enclosure Protection: IP21
- Regulation: EN 62479:2010, EN 62368-1:2014+A11:2017
- RoHS: Compliant
- Indoor Use Only

Wireless Room Thermostat

SKU: HI-WRT-D
