

The diagram shows a control panel with a vertical slider switch on the left and three circular buttons on the right. The slider switch has three positions: a top position with a power symbol (a circle with a vertical line), a middle position with a red indicator, and a bottom position with a power symbol. The three buttons are labeled 'ON', 'OFF', and '1/4'.

PLEASE NOTE:
The receiver units are mains powered and requires either a separate 3A fused spur or connection directly into the boiler if the boiler is powered from a 3A fused spur.
